

		Final Laboratory Report		PID : 139392	
Name : Mr. Pranjal Sharma		Sex/Age : Male / 21 Years		Lab ID : 2155015276	
Ref. By : SRF-0914400098589				Ref. ID :	
Corporate : Bhavya healthcare				UID : 619306755405	
Reg Dt. Time: 11- Apr -2021 11:05		Report Released @ : 12-Apr-2021 15:18		Sample Type : Nasopharyngeal and Oropharyngeal Swab	
Sample Dt. Time: 11- Apr -2021 11:05		Report Printed @ : 12-Apr-2021 16:05			

Molecular Biology

Test	Result	Unit
COVID 19 - (RT PCR) QUALITATIVE TEST		
2019 (SARS-CoV-2) RNA Detection	Not Detected	
COVID-19 E GENE	Not Detected	
COVID-19 Orf 1ab Gene	Not Detected	
Interpretation.	NEGATIVE FOR SARS CoV-2	

ICMR Registration No: **NEDIPLNUP**

Comment:

1. A **"Detected"** result indicates that severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) RNA is present and suggests the diagnosis of coronavirus disease 2019 (COVID-19). Test result should always be considered in the context of patient's clinical history, physical examination, and epidemiologic exposures when making the final diagnosis.
2. A **"Not Detected"** result indicates that SARS-CoV-2 is not present in the patient's specimen. However, this result may be influenced by the stage of the infection, quality, and type of the specimen collected for testing. Result should be correlated with patient's history and clinical presentation.
3. The sensitivity of the assay is dependent on the timing of the specimen collection (in relation to symptom onset), quality, and type of the specimen submitted for testing.
4. The test is specific for severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), and positive test results do not exclude the possibility of concurrent infection with other respiratory viruses.
5. Testing for SARS-CoV-2 was performed on a commercial ICMR approved RT-PCR kit/ US FDA EUA/CE IVD approved kits.
6. False negative results may be attributable to improper sample collections, improper transport, treatment, PCR inhibitors, etc.
7. The results of this test pertain to the sample received.
8. As per ICMR guidelines, the contact and test details of all patients undergoing COVID-19 testing need to be uploaded on the ICMR reporting portal and the same will be accessed by stakeholders including IDSP, MoHFW for timely initiation of contact tracing and appropriate control measures.
9. Ct Values stated above may be influenced by pre-analytical factors including sample type, sample collection, testing kit used and between testing laboratories, and are not indicative of severity of disease or disease progression. It is recommended that these values should not be used in therapeutic or patient management related decisions.
